# **Welcome to ASP/AML Amendment Invoice Update (WebEx)**

# Agenda

---

- Provide an update on progress
- Provide an update on Defects affecting the AMS invoice
- Provide Update on Xoserve Key Focus areas
- Next Steps
- Questions

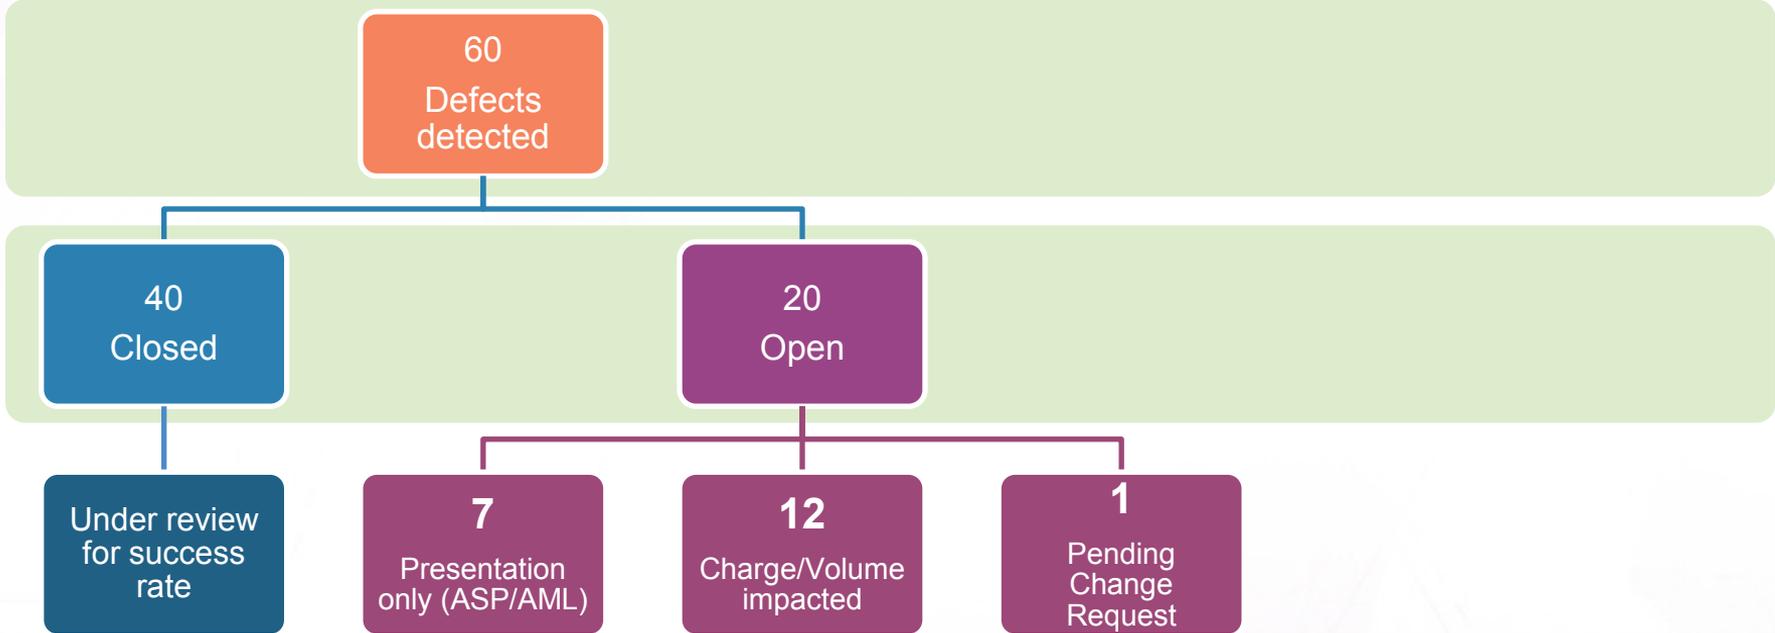

# Update on progress

---

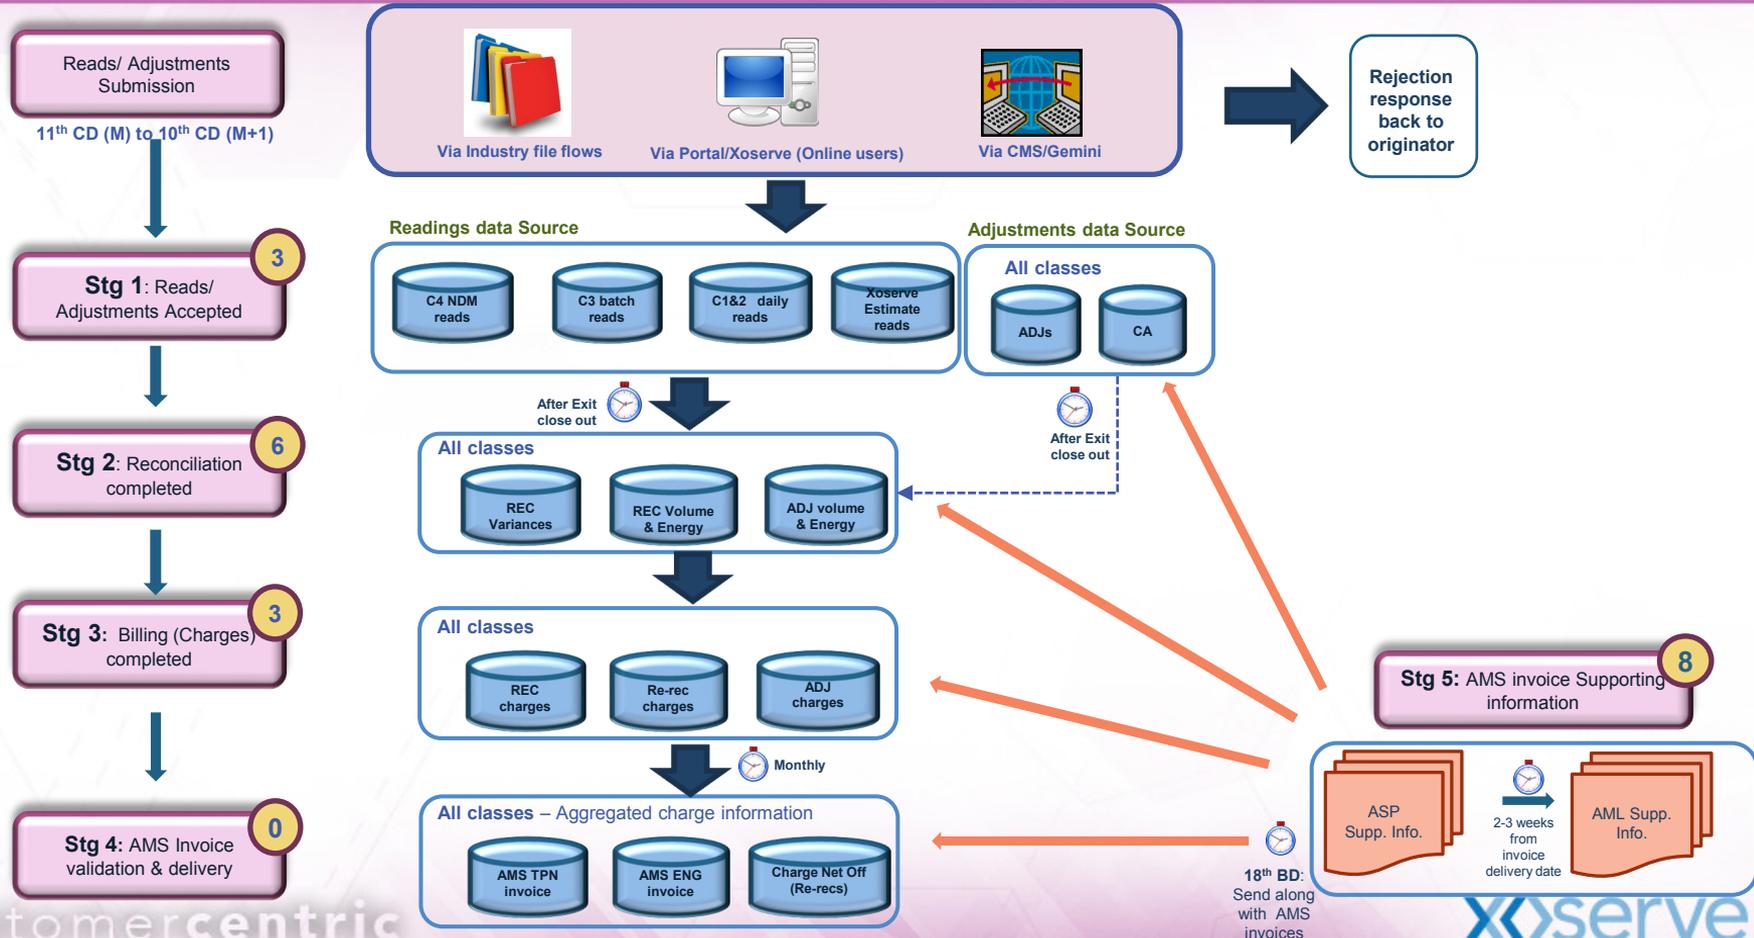

- A number of defects have been deployed but unfortunately this has not reduced the number of issues encountered
- Some defects have not fully resolved an issue or we have uncovered new scenarios
- Other defects identified as impacting ASP/AML files
- **New Scenarios**
  - Class 3 – Replacement reads – re rec forward not completed – excluded
  - Incorrect netting off of reversal charges in supporting information (presentation only)
  - Issue with one day rec volume calculation
  - Energy calculation issues
- **3 Phase Validation (CR307)**

The validation will not correct the mismatches, but it will speed up the validation process and allow the ASP correction files to be issued in a more timely manner. Currently in final assurance stages, implementation date to be confirmed

# Update on Progress – AMS Defects

# AMS invoice – Process stages vs open defects

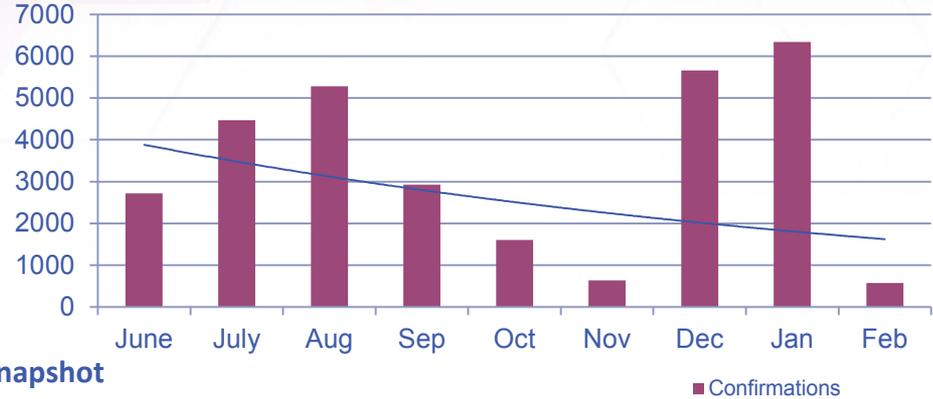

# Amendment invoice exceptions/exclusions trend

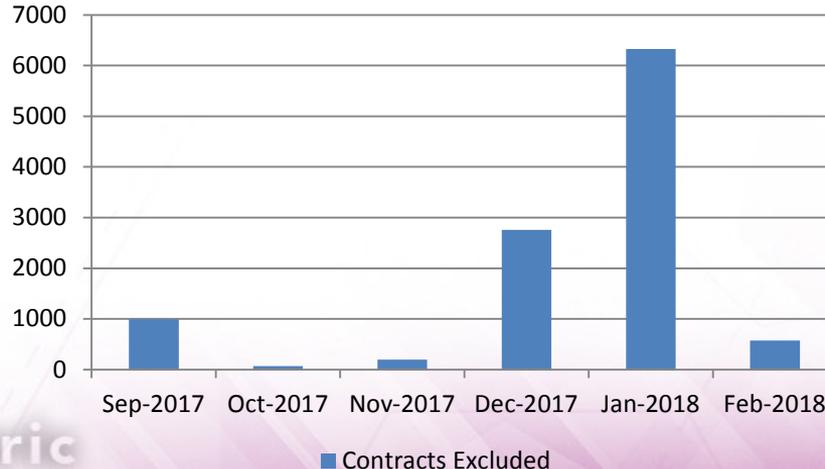

## Exceptions

## Exclusions

## Exclusions Snapshot

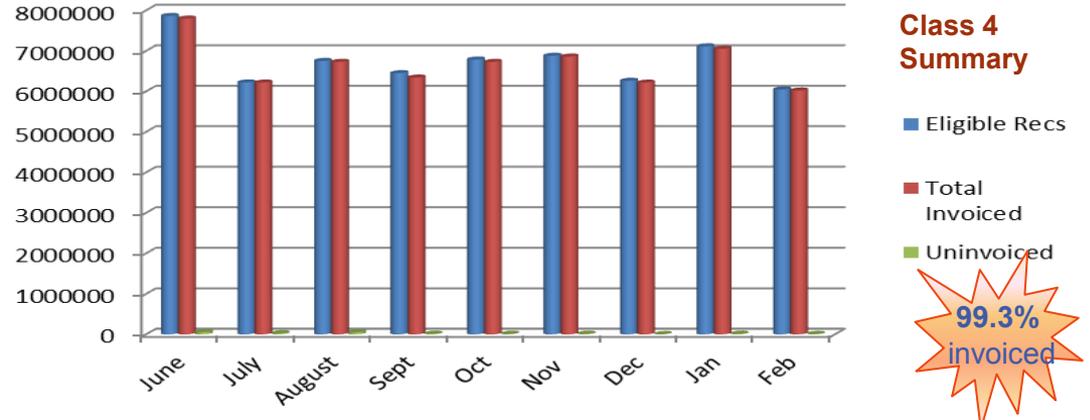

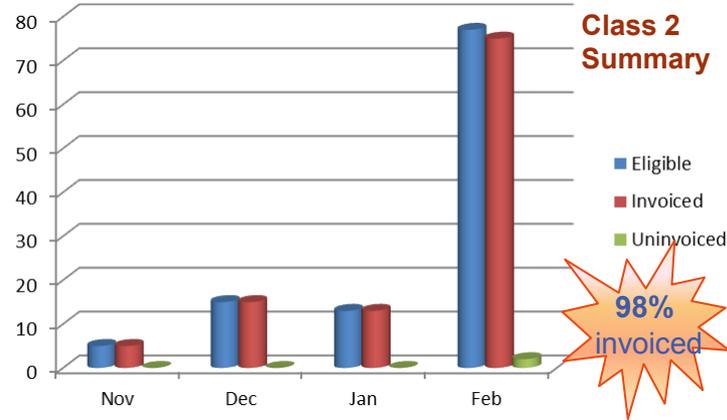

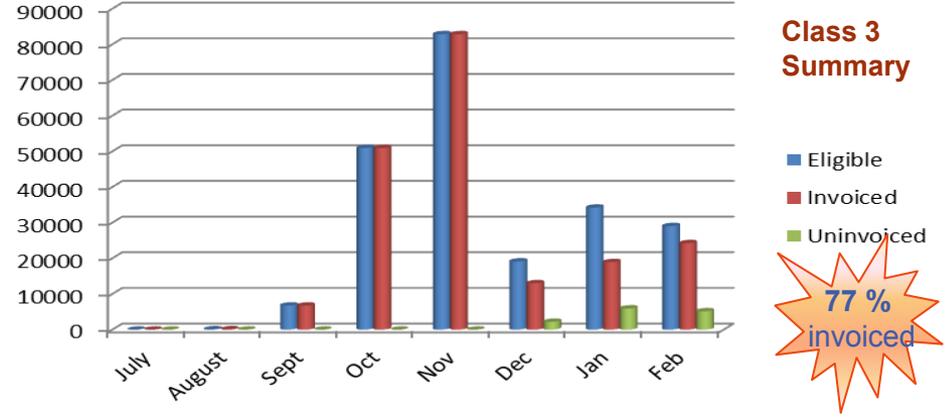

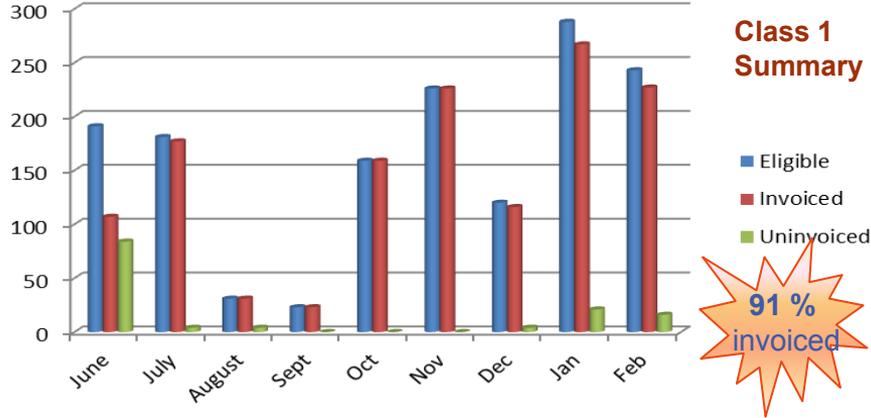

\*Increase in exclusions for December and January invoice mainly due to class 3 defect

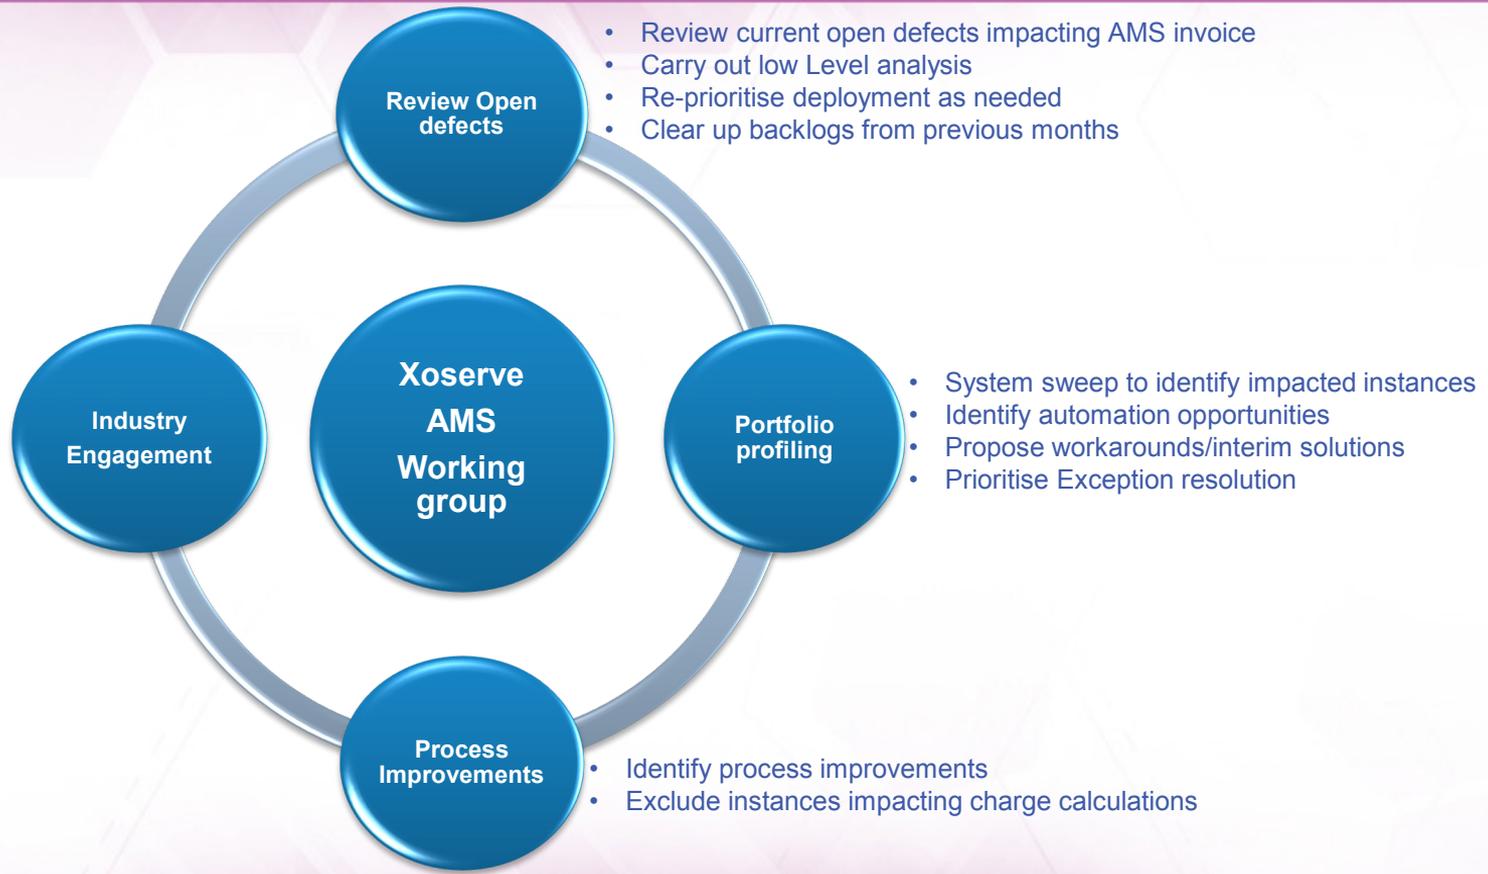

Snapshot showing Contracts by billing month still excluded due to defects

19,278 contracts Released following defect deployment

# Amendment Invoice – Key Stats

# Key Focus

# Next steps

---

- We plan to continue to exclude charges that have calculated incorrectly
- We will continue to update the invoice validation process in line with new scenarios and issues
- We will fully deploy change 307 and utilise this to more quickly identify mismatches and produce correction files
- There will be a Amendment Invoice ASP & AML files – The way forward workshop on Thursday 12<sup>th</sup> April.
  - To discuss the requirements of both files and to collaboratively explore potential solution options with input from your organisation.
  - The workshop is aimed at both technical and BAU parties who are familiar with the files and the processes.
