- The D-1 23:59 NDM/UG nominations will reflect the updated portfolio and AQ values
- All APIs containing nomination data for effective gas day D will only reflect updated portfolio and AQ values after 22:45 D-1

All timings are indicative subject to CSS physical design

Changes in Gemini – daily processes

Change in timing	• Loading of files relating to the meter ID, Portfolio changes and AQ updates • Monitoring to check if the files have been received
New processes	• Cancel approved gas nominations/re-nominations for Class 1 & 2 Meter Id's where a switch has taken place
Additional run of existing jobs	• Create activity numbers in Gemini • Class 1 & 2 nominations to create estimates
New ACT file	• New Gemini ACT file notification of meters that have switched.
