## Benefits and Justification

Benefit Description:	<p>The main benefit for XRN5732 is that IGT customers will be able to utilise the Contact Management System (CMS) to process Manage Unregistered Sites (MUS) and Gas Safety Regulations (GSR) contacts. This will provide them with the same functionality as DN customers, in this regard.</p> <p>XRN5890 will provide better visibility of MAP ID population and its source, to the CDSP. It will enable data provider behaviours to be evaluated and recommendations for improvements to be made to the Retail Energy Code Company (RECCo). For the avoidance of doubt, it is under</p>

	the REC where the Shipper, Supplier and Gas Meter Asset Manager (MAM) RGMA obligations lie.
	<i>What, if any, are the tangible benefits of introducing this change? What, if any, are the intangible benefits of introducing this change?</i>
Benefit Realisation:	The benefits of XRN5732 will be seen following implementation of the CMS part of this change.
	The benefits of XRN5890 are expected to be realised upon implementation and delivery of the first report.
Benefit Dependencies:	When are the benefits of the change likely to be realised?
	The CMS aspect of XRN5732 is required to be delivered to enable the process to be utilised by IGT's and realise the foreseen benefits.
	Please detail any dependencies that would be outside the scope of the change, this could be reliance on another delivery, reliance on some other event that the projects has not got direct control of.
