## A2: Impacted Parties

Customer Class(es):	<input checked="" type="checkbox"/> Shipper	<input type="checkbox"/> Distribution Network Operator
	<input checked="" type="checkbox"/> NG Transmission	<input type="checkbox"/> IGT
	<input type="checkbox"/> All	<input checked="" type="checkbox"/> Other, TSOs / PRISMA
Justification for Customer Class(es) selection	<p>This Change Proposal has been raised as National Gas require the Energy Identification Code (EIC) in the Gemini system to be updated from the National Grid EIC of <b>21X-GB-A-A0A0A-7</b> to the National Gas EIC of <b>55XNATIONALGASTC</b>.</p> <p>EIC Codes are a mandatory item required to facilitate the transfer of data between National Gas and PRISMA, our adjacent TSO partners and potentially certain APIs used by Shippers. There is an expectation that parties who interact with impacted files &amp; APIs will also have to make a corresponding change to the EIC Code at the same time to ensure the continued flow of data. Therefore, robust testing and clear communication of changes is vital to the success of this change.</p>	

	<p>Affected parties are:</p> <ul style="list-style-type: none"> <li>• National Gas Transmission (due to Gemini changes)</li> <li>• Shippers (Who use certain impacted APIs)</li> <li>• TSOs (who interface with Gemini)</li> <li>• PRISMA (who interface with Gemini)</li> </ul>

### A3: Proposer Requirements / Final (redlined) Change

<p>Problem Statement:</p>	<p>To support National Grid and National Gas separation activities, the Energy Identification Code (EIC) in the Gemini system needs to be updated from the National Grid EIC of <b>21X-GB-A-A0A0A-7</b> to the National Gas EIC of <b>55XNATIONALGASTC</b></p> <p>Having consistent EIC's is a pre-requisite for the completion of the system to system 'handshake' that facilitates a number of UNC obligated processes (as shown in the example below).</p> <p>Example 1 – Mismatching EIC Codes in the two systems would result in file transfer failure</p> <p>Example 2 – Matching EIC Codes in both system results in a completed file transfer</p> <p>The ambition is to target a summer implementation of this change, taking into consideration the Sustain Plus go-live and the need for a robust testing period that can be supported by impacted parties.</p> <p>A key aspect of this change will be providing clarity on what exactly industry participants will need to do to make the necessary changes to ensure continued file/API transfer and communicating that out to impacted parties.</p>
<p>Change Description:</p>	<p>Based on initial analysis, the proposed change will require a data fix in Gemini to amend the EIC Value from the National Grid EIC to National Gas EIC in the respective Gemini database. This will allow the system to consider the appropriate National Gas EIC Code for all file/message validation and exchanges with TSOs, PRISMA and Shippers.</p> <p>The expected level of change within Gemini is minimal requiring only a data level update rather than a file format change, as the EIC Code is already included within the file format.</p> <p>System Integration testing between Gemini and third party impacted systems and aligning any third-party changes will be crucial for the success of this change.</p>

	<p>It is expected that this change will only be required to be completed in Gemini Sustain Plus.</p> <p>For efficient governance, it is suggested that this Change Proposal should be associated with XRN5781 as a 'child' Change Proposal as funding will come from XRN5781 Gemini Regulatory Change FY25 Change Proposal.</p>

#### A4: Benefits and Justification

Benefit Description:	The change would ensure the continued flow of data that facilitates UNC obligated processes (e.g. EU Nominations)
	<i>What, if any, are the tangible benefits of introducing this change? What, if any, are the intangible benefits of introducing this change?</i>
Benefit Realisation:	The benefit of this change would be realised immediately post go-live, with the continued flow of data between industry parties for key processes.
	<i>When are the benefits of the change likely to be realised?</i>
Benefit Dependencies:	There is a direct dependency on impacted industry parties making the corresponding changes at the same time as the changes are made in Gemini
	<i>Please detail any dependencies that would be outside the scope of the change, this could be reliance on another delivery, reliance on some other event that the projects has not got direct control of.</i>
